## SUMMARY

Results-driven software developer with hands-on experience across front-end & back-end development, UI/UX design, and technology integration. Adept at implementing industry best practices to build scalable, maintainable, and high-performing web applications. Proven ability to deliver projects from concept to completion.

## SKILLS

Languages: Java, JavaScript, HTML/CSS, C#, NodeJS, C/C++, SQL

Libraries & Frameworks: ReactJS, React Native, ExpressJS, Spark Java, Bootstrap, SCSS, Socket.IO, Material-UI

Tools & Platforms : Bash, Git, Github, AWS, Nginx

## EXPERIENCE

### Produce Team Member | Whole Foods Market

May 2023 - Present, Seattle, WA

- Maintain and operate the department at 100% capacity in critical circumstances resulting in 33% operating cost savings.
- Instruct and supervise six new team members to ensure seamless onboarding process.
- Award Employee of the Month by store leadership for operational excellence and self-responsibility.

### Software Engineer Intern | Xemelgo

October 2019 - March 2020, Bellevue, WA

- Administered the end-to-end functions of a new job tracking feature to aid customers in tracing actual labor hours.
- Successfully designed and deployed DynamoDB tables and RESTful APIs on AWS through utilization of Serverless framework.
- Leveraged React Native to support mobile development and simulated on Android and iOS platforms.

### Undergraduate Research Assistant | University of Washington

January 2019 - December 2019, Seattle, WA

- Improved the quality of a national curb dataset by assessing a sample of data points, identifying locations with incorrect curb data, and creating a data validation tool to improve the data accuracy in the future.
- Established backend utilizing NodeJS, ExpressJS, Turf to process GeoJSON files from public city data.

### Undergraduate Research Assistant | South Seattle College

January 2017 - March 2017, Seattle, WA

- Deployed a Raspberry Pi sensor to outline wifi traffic and to insert data in MongoDB database for analysis.
- Utilized software package or analysis toolset to turn raw data into more useful information and insights.

## PROJECTS

### Portfolio Website

December 2023 - Present

- Develop personal responsive website to showcase my portfolio of software development projects.
- Optimize website performance and usability with SEO best practices in mind.

### Collaborative Canvas

December 2023 - January 2024

- Utilized technical skills in software development to innovate an interactive tool for seamless collaboration and demonstration within the team.
- Empower teams to improved productivity and visualized creation in remote environment.
- Designed and developed a robust and scalable web application by implementing industry best practices.

### Stock Performance

January 2018 - March 2018

- Permitted stock investors to compare various stocks' performance.
- Extracted stock data from Quandl financial services API and inserted into MySQL database.
- Adopted Object-oriented design and MVC, organizing the code for maintainability and scalability.

## EDUCATION

### Full Stack Java Developer | Per Scholas

Seattle, WA, 2024

### Bachelor of Computer Science | University of Washington (UW)

Seattle, WA, 2020

## CERTIFICATIONS

### AWS Certified Developer - Associate | Amazon Web Services

2023
